

I would like state my feelings regarding the "localism" campaign. From what I understand, this could effect how I am able to listen to K-LOVE, a listener supported Christian ministry station out of California broadcast all over the US because the FCC has introduced the LPFM and is proposing to expand the service. I can't even begin to tell you what an impact K-LOVE has made on our community. I have a retail business that I play K-LOVE on and people come in all the time and recognize this station. In these troubled times, we desperately need the spiritual uplift and strength provided by this station. Their programming is so positive and so encouraging. We have enough regular stations and I would hate to see our city loose this station and such a source of reinforcement to support our leaders, armed forces, government, and each other. There is never any negativity from the DJ's, but always an objective presentation of the news around the world. Please don't let this station be taken from us - with the world going thru all that we are facing, we surely need all the positive reinforcement we can find.

Thank you for your time
